ENAGO EXPRESS

Everything Enago

What's New?

Eric Zheng, from our China strategic alliances team, had the privilege of representing us at the Times Higher Education (THE) Innovation & Impact Summit in Shenzhen, China, held on November 7-8, 2023. During this summit, we not only had the opportunity to establish meaningful new connections but also to strengthen existing partnerships with our long-standing Chinese university collaborators and colleagues.

The sessions were remarkably enriching, providing us with the chance to engage in thought-provoking discussions with various universities on topics such as Creating Innovation and Sustaining and Supporting Innovation. Here are some highlights from our remarkable time at the summit.

WHAT OUR CLIENTS HAVE TO SAY

"Everything is perfect. The order was delivered one day before the deadline. The paper was accepted after the required language improvement."

"I am so upset with the revision because it converted a high quality publication into a mediocre report. I trust you had qualified professionals doing the revision. The revision has changed the meaning of the text! It seems to me that there was a need of showing service and making completely unnecessary changes in the text, which actually impacted the meaning! "

"The editor who assisted in the editing was very good. He helped me revise many sentences and provided many valuable suggestions. I hope this editor will revise it in future as well. "

"Too many parts of the text have been changed and are not usable. Obviously, the proofreader is not a scientist and seems to have little understanding of the content of this paper, so I would like to see it composed only in English grammar and phrasing. It is not good if the content is changed by amateurs."
